EDUCATION

Georgia Institute of Technology, College of Computing

Atlanta, GA

Master of Science in Computer Science

Aug 2024 - Present, Part-time

The Ohio State University, College of Engineering

Columbus, OH

Bachelor of Science in Computer Science and Engineering

May 2022

SKILL

Coding Languages: Python, Java, Swift, JavaScript, TypeScript, C, C++, Go, SQL, JSON

Frameworks and Tools: Git, React.js/ts, Spring Boot, AWS, Jenkins, XCTest, Hibernate, Node.js, GitHub Actions Industry Knowledges: Software Engineering, Object-Oriented Programming, Test Driven Development, Agile, CI/CD

WORK EXPERIENCE

Software Engineer

Austin, TX

Apple Inc.

Jun 2025 - Present

- Software engineer in Apple IS&T org
- IS&T supports both customer-facing and internal platforms from apple.com and Apple Retail systems, to tools used by AppleCare, People teams, and enterprise-wide data and identity platforms

Software Engineer II

Columbus, OH

JPMorganChase

Jan 2025 – May 2025

- Developed an enterprise-level full-stack application for tracking Legal Entities and JPMC's legal permissibility to place trades, utilizing Spring Boot, Hibernate, React, Oracle DB, and microservices architecture
- Gained hands-on experience across all stages of the software development lifecycle, including planning, building, testing,
 and deployment
- Collaborated effectively with developers, product managers, and end-users to deliver high-quality application

Software Engineer I

Columbus, OH

JPMorganChase

July 2022 – Jan 2025

- Developed a full stack application with React.js, Java, Spring Boot, MyBatis, and Oracle DB for the Core Development Engineering team. Utilized Apache Kafka to implement event based microservice architecture and process database transactions
- Developed a test generation tool that copies all or a part of the customer's production data from their DB to be used as
 testing data. The customer would submit a generation request by submitting a REST request with a body to the endpoint
 hosted by AWS API Gateway, which gets stored in the AWS DynamoDB after triggering an AWS Lambda function to
 process the request

Software Engineer Intern

Cupertino, CA

Apple Inc.

May 2021 – Aug 2021

- SWE intern in the Internet Technologies team as a Comm Application Automation Intern
- Assisted the Apple Mail team with the testing and production of the Apple Mail app on macOS platform. This included
 writing automation tools and code for testing the app, diagnosis of bugs found, and filing a bug report. Wrote tools with the
 internal automation framework in Python and Swift (XCTest)

iOS R&D Technical Intern

Cary, NC

SAS Software Inc.

May 2020 – Aug 2020

- Responsible for Data and Analytics Visualization app on the iOS platform
- Assisted the iOS software engineering team with the development and production of the SAS Visual Analytics app. This
 included writing automation tools and code for testing the app, diagnosis of bugs found and developing fixes in the code.
 The internship also involved prototyping and developing solutions on the mobile platform for a research topic in Analytics,
 Data Visualization and Mobile Computing
